

CA Sea Grant Russian River Salmon and Steelhead Monitoring Program Field Internships

Fall 2021 application deadline: June 27th 2021

Overview

Located in Windsor, Sonoma County, our program monitors native, endangered salmon and threatened steelhead populations to support recovery efforts throughout the watershed. Interns will assist California Sea Grant biologists with scientific data collection for fish and environmental monitoring efforts. Fall field work includes electrofishing, habitat assessments and spatial mapping, streamflow monitoring, and operating PIT-tag detection equipment.

Qualifications and Requirements

A strong interest in fish biology, natural resource management, or a related field is a must. Applicants must be able to hike for long distances in rugged stream channel environments while carrying survey equipment, and lift up to 75 pounds. The position is approximately 20 hours/week from mid-August through early-November. A stipend of \$3,600 will be provided.

Commitment to Diversity and Inclusion

We encourage applicants from groups that are historically underrepresented in the sciences to apply to this program, including Black, Indigenous, Latinx, female, first-generation college students, veterans and LGBTQ+ individuals, as well as those who have experienced and worked to overcome educational or economic disadvantages, and/or who have personal or family circumstances that may complicate their career paths.

To Apply

Send cover letter and resume to Sarah Nossaman at snossamanpierce@ucsd.edu
